EFS FUEL TAX

The EFS Fuel Tax solution is an innovative reporting software tool providing one of the most accurate and comprehensive fuel tax solutions in the transporation industry.

WHY CHOOSE EFS FUEL TAX?

- Quarterly IFTA fuel tax processing
- Individual state weight-mileage returns required by Kentucky, New Mexico, New York, and Oregon
- Automated fuel purchase imports from all major fuel card providers
- Ability to integrate GPS and dispatch data from industry leading mobile communication and logistic software providers
- Easy and intuitive methods for entering specific information that is not captured by automated processes
- Personalized audit and consulting support for all your fuel tax needs
- Detailed route information with the EFS Fuel Tax mapping solution
- Powerful exception handling tools to assist with managing erroneous data points
- Fleet and truck-level reporting for use in driver settlements and performance reporting
- Bulk fuel inventory and transaction management
- Assists with preparing UCR, IRP, and 2290 reports
