EV fleet adoption:
TOP 9 DRIVERS

As you build your mixed-energy fleet you'll find there are ways you can best prepare including:

- Understanding battery range needs
- Enabling overnight charging
- Minimizing ad-hoc charging costs
- Investing in tools to prioritize routes for electrification
- Selecting the right vehicle for whatever purpose it has for your business

As the EV landscape continues to evolve, smart payment solutions will play an increasingly crucial role in helping organizations navigate the complexities of mixed-energy fleets.

Here are the top 9 drivers of commercial EV adoption from Frost & Sullivan's 2025 research:

1. Reduced carbon emissions
2. Meeting decarbon-ization goals
3. Saving money
4. Enjoying advancements in battery technology
5. Solidifying brand image
6. Experiencing lower EV buying/ operating costs compared to ICE vehicles

7. Discovering how EV charging costs are lower than ICE fuel
8. Expansion of charging network
9. Gaining competitive advantage

Find a fuel card provider who has EV covered. WEX is that provider.
