

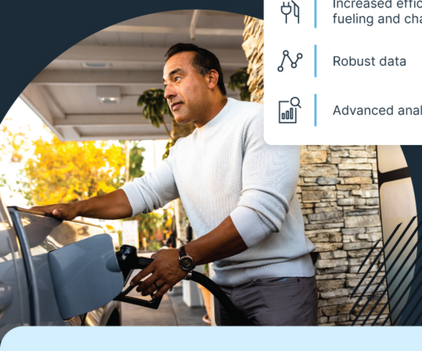
PUBLIC SECTOR FLEET CARDS:

Everything you need for your fleet

Government organizations have unique requirements. You want to find a fuel card provider who understands that and gives you everything you need to manage your fleet, no questions asked.

Partner with the best provider and soon you will realize significant control and visibility over your fleets. **With the best cards you will get:**

- Increased efficiency in fueling and charging
- Robust data
- Advanced analytics

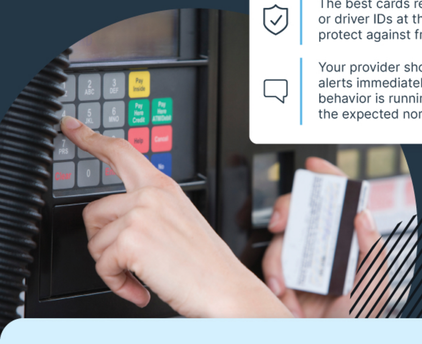


Why are advanced analytics important?
Because with that kind of data analysis you can:

- See costs go down
- Increase regulatory compliance
- Improve operations

Most importantly, you need a fleet-management provider that **protects against fraud and misuse:**

- The best cards require PINs or driver IDs at the pump to protect against fraud
- Your provider should send you alerts immediately when user behavior is running outside the expected norms



Look for a fleet card that provides:

- Electronic billing
- Tax-exempt reporting
- Spending limits
- Enhanced fraud protection at filling stations
- Round-the-clock support

Everything you need for your fleet

For the public sector fuel card provider who knows what you need, **contact WEX today.**
