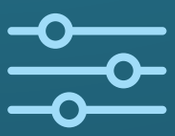
Telematics: helping you build operational efficiencies for your commercial fleet

Fleet management - when optimized - can lead to stronger security, fewer fraudulent charges, lower costs, simplified operations, and a reduced burden on your team. With the right tools you can manage with panache. Telematics integrated with your fuel card is one of those must-have tools.

Telematics allows you to:

Eliminate manual data entry which means fewer errors



Track detailed fuel usage by vehicle, driver, and time so you can identify trends, inefficiencies and cost-saving opportunities

Enhance your protection against fraud and misuse via pre-set spending limits

Simplify your expense reporting so you can analyze fuel and other driver expenses with just a few clicks
