- ▶ Web-based
- ▶ Efficient

## TRUCKING PERMITS

As a single contact for all trucking permit needs, EFS can help streamline processes and return company time and resources. EFS Web-based permit service allows a company to order trucking permits online 24 hours a day, 7 days a week. Once an order is submitted, tracking tools provide visibility to the permit status in all phases of the ordering process. Access to completed permits is available anywhere there is an Internet connection and a printer.

Integration enables a company's system to automatically update tractor and trailer information and facilitates a fast and easy ordering process with less information to input each time. EFS also provides reports that help reconcile permit expenses and show all permit activity.

Types of Temporary Trucking Permits:

- ▶ Over Dimensional/Overweight Permits
- ▶ Trip Permits
- ▶ Fuel Permits
- ▶ New Jersey Alcohol Permits
- ▶ New York HUT Permits
- ▶ Superload Permits
- ▶ Annual Permits
- ▶ Canadian Permits
- ▶ Oregon Weight Mile Pass

## TRUCKING PERMITS

**One-stop ordering.** Easy online ordering process gets drivers the permits they need for the entire trip, origin to destination.

**Save time with technology.** Our web-based application can be integrated to automatically update tractor and trailer equipment files, and the system allows a person to copy a previous route order, making dedicated lane orders fast and easy.

**Keep permit costs together.** Receive one consolidated invoice incorporating all permit orders and costs to help increase office efficiencies.

**Tracking capabilities.** Online tracking tools give visibility to see where a permit is in the ordering process, and the permit images are stored in the system allowing authorized users to print the permits directly from the website.

**Fast turn around.** Our dedicated permit team holds direct relationships with the states allowing quicker turn around times.
