

**FLEET  
ClearView™**

Our new WEX Fleet ClearView analytics platform will give managers a dynamic view into their fleet operations. You'll have the ability to combine and analyze large amounts of data, and use the results to take corrective action. Whether it's identifying and understanding short- or long-term trends, reviewing performance benchmarks or isolating outliers and anomalies, you will be able to bring your analysis and decision-making to new levels without the time-consuming, manual calculations.

*Save valuable time, reduce manual calculations, develop and execute cost-saving policies — all within a user friendly platform.*

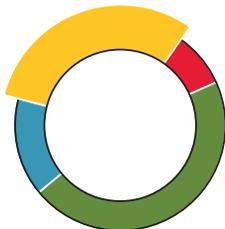

## ABOUT FLEET ANALYTICS

Our intuitive web-based platform provides an integrated view of fleet-related activities and expenses.

- Gain a clearer picture of vehicle and driver performance to identify cost savings opportunities
- Streamline operations to help eliminate redundancies
- Identify outliers and anomalies to reduce fraudulent activity and identify opportunities for driver education
- Quickly identify areas of your organization that need to focus on key performance indicators like card activation rate and price per gallon
- View volume and price information by merchant brand to divert drivers from high-price stations and negotiate better rates for heavily-utilized merchants.
- Review purchasing patterns to better understand trends in expenses

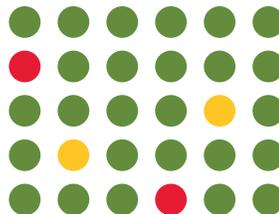

### FEATURED CLEARVIEW MODULES

#### VOLUME & SPEND MODULE

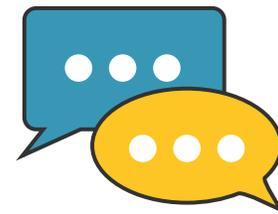

Provides detailed information into your organization's fuel card spend. Easily view Key Performance Indicators, review expense detail by product, geographical, and organizational distribution, isolate high-spend drivers, and create spend and volume metric comparisons across a variety of dimensions.

#### EXCEPTIONS MODULE

Allows you to view transactions and driver activity that fall outside of normal behavior and require your attention. View trends over time.

#### COMMUNITY MODULE

Allows you to network, collaborate, participate in discussion groups on fleet-related topics like positively impacting driver behavior or reducing fraudulent spend, pose questions, and share best practice information with your fellow analytics peers.

Fuel Price Analysis, Driver Performance, and Vehicle Performance modules will be released in the near future.
