

FUEL CARDS

ACROSS THE BOARD SECURITY

There are lots of things to think about when picking a fuel card provider. The most important qualities for your top choice pick are that the card offers strong fraud protection, scalability, built-in management, and cost controls.

YOU WANT A CARD THAT:

Is accepted at the majority of fueling and charging stations in your region

Protects you against fraud and misuse with built-in notifications and controls

Offers automatic rebates

Delivers real-time insights into user behavior

Can be accessed with a card, on an app, or on a mobile device

Is backed by round-the-clock support

THE RIGHT FUEL CARD DELIVERS TOTAL CONTROL INCLUDING THROUGH:

Details on daily, monthly, and annual spending

Purchase protections to prevent fraud and misuse

Streamlined reporting through real-time account access

A consistent user experience offered on any device

Fraud protection is critical to any successful fleet operation. Look for a card that lets you set limits and parameters for spending and one that notifies you immediately in the case of exceptions. It should offer built-in PIN/ID protection and be easy to cancel if lost or stolen.
